THE IMPACT ON MY CAREER OPPORTUNITIES**

"As a Chinese student, studying at a French Grande École was very important to me and EDHEC was my first choice because of its specific finance offer. The fact that EDHEC ranks top five in the Financial Times MSc Finance ranking was key in helping me making my choice. Ending my academic journey with the MSc in Financial Markets programme in Nice was a truly inspirational experience: a perfect example is when I was invited to London to attend EDHEC Risk Days 2014 where I met potential employers and interacted with financial industry leaders. The level of financial teaching is so high and demanding that when you successfully graduate from EDHEC you know exactly what you are worth!"
